

Assignment 2

- 1) The aim of this assignment is to demonstrate your iOS programming skills.
- 2) Your task is to extend your iPhone app from Assignment 1. You can add any new features you like.
- 3) The deadline for submitting your code is noon on Tuesday 25th September 2012.
- 4) Your marks will be based on:
 - 1) New features - what new functions have you added, and are they different from other people?
 - 2) Use of web services - can you pull data from the web?
 - 3) Style - does your code follow the Objective C standard, and is it easy to read?
